Established 1887

'entagon 'Spies' **leported Known** lo Nixon in 1972

By Seymour M. Hersh

WASHINGTON, Jan. 14-(NYT).—David R. Young jr., a memberhe White House "plumbers" group, concluded in a special report President Nixon in early 1972 that Adm. Thomas H. Moorer, irman of the Joint Chiefs of Staff, had received secret National urity Council documents taken from the office of Henry A. singer, well placed sources said yesterday.

Mr. Young's report, described by some sources as having been book length," was said to have summarized his investigation into an alleged military-intelligence operation inside the White House. The sources said that Mr. Young had concluded that classified materials were provided both to Adm, Moorer's office and to Jack Anderson, the columnist, whose publication in December, 1971, of White House papers on the India-Pakistan war initially prompted the in-

> The existence of Mr. Young's formal report became known as the mystery deepened and questions mounted over the militaryintelligence operation.

A New York Times dispatch from Washington Saturday reported that one of the officials who participated in Mr. Young's inquiry had later sought to "blackmail" his way into a more important job by threatening to make the secret material public as well as to expose the existence of the military activities inside the White House.

Queries Shunned No one in the White House would respond yesterday to tele-

On Friday, the White House

said that the source of some "de-liberate leaks to the media" had

been traced to a "low-level em-

ployee whose clerical tasks gave

him access to highly classified in-formation." The statement made no mention of the allegation of

military spying inside the White-House Adm. Moorer has denied

any knowledge of the alleged in-

A basic question that arises as

Union Seen in Doubt

Tunis Ousts 'Architect' Of Libya Merger Pact

By Jonathan C. Randal TUNIS, Jan. 14 (WP).-Barely two-day-old plans for merging Libya and Tunisia into the Islamic Arab Republic today suffered a major—and perhaps fatal—setback when the principal Tunisian proponent, Foreign Min-

unceremonlously fired. No government explanation accompanied the radio announcement of a four-post cabinet shakeup. Mr. Masmoudi's name was not even mentioned.

ister Mohammed Masmoudi, was

Nor was there any mention of the merger plan on the state-controlled radio and the Tunisian News Agency. The radio and agency abruptly stopped carrying provincial messages of support for the scheme, which many Tunisians are criticizing.

Mr. Masmoudi was replaced as foreign minister by Habib Chatti, who was director of Mr. Bourgulba's presidential cabinet. In an interview. Mr. Masmoudi said President Habib Bourguiba today invoked the minister's allegedly anti-American policies on China, North Vietnam and Cambodia for dropping him after more than 3 1/2 years in the

foreign affairs job. Castle With Antiques Speaking in his luxurious sub-

Gain Is Seen on EEC Regional Fund urban home—a former castle filled with antiques — Mr. Masmoudi, in full-length Arab gown and slippers, expressed the hope that the merger would go ahead despite his eviction from govern-But barring unforeseen

velopments, without Mr. Masmoudi's constant prodding presence, analysts doubted that the merger would amount to more than a footnote in Arab history as the shortest-lived such scheme. Speaking of the agreement signed between Mr. Bourguiba and Col. Mosmer Qadhafi of Libya Saturday on the Tunisian island of Djerba, Mr. Masmoud said, "I consider the signatures

as fine signatures and if the price of a merger is my person, it's little enough to pay." Political analysts suggested that the surprising merger au-nouncement Saturday—and the equally surprising disgrace of Mr. Masmoudi today—reflected the swirling domestic infighting

which has surrounded the increasingtly mercurial Tunisian President. 'Supreme Combatant'

puritanism—be it in the form of bookburning or banning mini- old age that his lieutenants were skirts and alcoholic beverages. Tunisians were agon in following "Masmoudi's coup" with the "counter-coup" today. But running throughout much

of the excited conversation was a note of sadness that Mr. Bour-

to be overly rational." In his interview, Mr. Masmount and Mr. Bourguiba reproached him with having angered the Americans in years past by recognizing China, North Vietnam and Prince Schanouk's Pekingbased government-in-exile.

The President said that Americans had said Mr. Masmoudi would not be welcomed in the White House when Mr. Bourguiba, who is intensely pro-American, is scheduled to make one of his periodic visits to Washington

able to maneuver him openly

into first accepting, then all but formally reneging on Such an in-

Even some of the drama's ac-

tors privately cautioned against

what one of them called "trying

portant project.

"I told the President that was ancient history with the Americans," Mr. Masmoudi said. He made no secret of his past polic; differences with the United States which were often more regretted than resented in Washington, aithough Tunisia has received more U.S. aid than any other African country except Morocco and

Mr. Masmoudi said he first realized the project was in trouble at 1 p.m. today.

Trip to Switzerland The tipoff came when the mdio failed to carry a communique he had worked out with Mr. Bourguiba this morning, mamtaining Jan. 18 as the day for the merger referendum in both countries and announcing that the President was putting off a trip to Switzerland in consequence.

During their morning meeting. Mr. Bourgulba had mentioned the alleged American objections to (Continued on Page 2, Col. 4)

Mohammed Masmoudi arriving in Tunis from Libya Sunday. Yesterday he was ousted as foreign minister.

Israeli Proposal Not Rejected

Kissinger Says Egypt's Plan 'Substantially Narrows Gap'

gagement was not being rejected, Egypt today forwarded to Tel Aviv, through American Secretary of State Henry A. Kissinger, its own "plan and a map" for a pullback which Egypt called "the

first step toward peace."

Mr. Kissinger took the Egyptian ideas and documents back to Israel in the fourth consecutive day of "shuttle diplomacy" which has seen him visit each country twice. In his departure statement, read by the U.S. ambassador, Mr. Kissinger said: "The gap Ibe-tween the two nations' disengagement demands) has been sub-stantially narrowed."

Mr. Kissinger altered his schedule for tomorrow to press ahead with efforts to shape the first substantial accord between Israel and an Arab neighbor since Israel's founding 25 years ago. He said: "I will not make any plans where else I will go until I see how much more needs to be

The American arrived in Jerusalem at midnight, Jordan announced that Mr. Kissinger's scheduled visit there tomorrow for consultations with King Hussein was being postponed until later in the week, and the military-level talks scheduled for tomorrow in Geneva were post-poned, reportedly at the Egyptians' request, today. Observers said that the Egyptian and Israeli delegates to those talks may, at their next meeting sign an ac-cord now being worked out.

But, in an indication that matters were still somewhat in flux, with Mr. Kissinger's persuasive powers still facing a challenge when he got to Israel with Egypt's plan and map, there were differing predictions about the time of his return here.

Egypt's Foreign Minister Ismail Fahmy said Mr. Kissinger would return here tomorrow night. U.S. Ambassador Hermann Eilts said that his cluef would be back within a day or two.

Mr. Kissinger's statement described his four and three-quarter hours of talks today with President Anwar Sadat as "fruitful, constructive and useful." But he said that the armies' disengagement was a complicated matter, "There are many dif-

ferent aspects which were discussed," he reported, His talks today began with a 3 1/2-hour session with Mr. Sadat, in the Nile-side villa where

the President has been resting since a bronchitis attack last

Working groups headed by Mr. Kitsinger and Mr. Pahmy

ASWAN Egypt, Jan 14 (AP).— then caucused and held a joint Specifying that the Israeli-cp-proved proposal for troop disensecretary and the Egyptian President again met, for an hourand-one-quarter session before

Mr. Kissinger's departure. Sources here said that the disengagement plan now taking shape in the negotiations calls for an Israeli withdrawal of more than 20 miles, to the foothills of two strategic mountain passes in the Sinai, in return for the "thinning out" of Egyptian infantry and armor on the cast bank of the Suez Canal.

The disengagement evidently would be accomplished in stages, with a buffer zone manned by UN forces, the sources said.

UN spokesmen in New York said that Mr. Kissinger had messaged Secretary-General Kurt Waldheim with a "positive" report on his peace-making mission, which may also take him to Syria after a delayed visit to

Mr. Kissinger, chatting with (Continued on Page 2, Col. 6)

Bobbies Armed As Court Hears U.S. Girl, 2 Men

LONDON, Jun. 14 (UPI).— Police carried arms—a compara-tively rare occurrence in Britain -while surrounding a suburban Uzbridge court today for a formal appearance by an American girl and two men accused of a gunrunning conspiracy. The arming of the police cor-

don was part of the intense security precautions that have been taken to guard Allison Rae Thompson, 18, Abdelkbir el-Hakkaoui, 25, a Moroccan and Athar Nascem, 21, a Pakistant, all residents of Santa Barbara, Calif.

Miss Thompson and Mr. Hakkaoui were arrested at London's Heathrow Airport Dec. 29 when, police said, five pistols and 150 rounds of ammunition were found in a false bottom of Miss Thompson's suitcase. Mr. Naseem was arrested New Year's Eye when he arrived at the airport. All three have been charged

with conspiracy to possess weapons illegally, and Miss Thompson also faces a charge of illegally possessing a weapon. At today's court appearance, a

formality, the three were ordered held without bail for another week. In California, a friend, Theodore D. Brown, 31, has been charged by the FBI with supplying the guns and ammunition to Mrs Thompson

South Vietnamese Troops Retake Major Border Camp

SAIGON, Jan. 14 (AP).-A it to make their infiltration of unit of 30 South Vietnamese troops today recaptured a border camp in the Central Highlands four months ago by the North Vietnamese, the Saigon command reported Helicopters landed the govern-

ment patrol in the Le Minh camp and they met only light resistance, according to the government's chief military spokesman, Lt. Col. Le Trung Hien. Other sources said the patrol landed just after noon after 40 strikes by South Vietnamese heli-

copter gunships and bombers. Col Hien said a regiment was moving toward the camp to support the advance party.

The camp is 23 miles west of Plaiku, the capital of the Central Highlands, and 15 miles from the Cambodian border. It was lost on Sept. 22 and was the first battalion-size government position the North Vietnamese have captured since the Jan. 28 cease-fire. The camp was defended by about 400 government Rangers, half of them Montagnard tribesmen. They abandoned the camp after five hours of heavy fighting. "The base is located on an in-

filtration corridor," Col. Hien said, and we believe the North Vietnamese wanted to get rid of

12 Die in Food Riots In Western India

NEW DELHI, Jan. 14 (Reuters). The western Indian state of Gujarat was reported calm yesterday after three days of widespread food riots that left at least 12 dead and an unknown number of injured.

The official toll rose to 12 with the death yesterday of a man shot by police Friday in Beroda, scene of some of the worst disturbances. Officials said yester-day that no violent incidents had been reported from anythe state since midnight. A curlew was relaxed in most areas for a few hours to allow essential shopping to be

fair on the current estimates."

"It's hard to make guesses about what Hanoi is going to do without guys are telling Kissinger." an analyst said, "about whether or not Moscow and Peking would help Hanoi out in resupplying an all-out offensive," he added.

In an interview, Mr. Colby confirmed this, but he went on to say: "Kissinger keeps me informed on his conversations with foreign leaders, but I don't get a full formal debriefing. I don't pass this down to the analysts. except on rare occasions. These conversations are very sensitive. I myself factor them into the formal estimates of the intelligence community."

The prevailing judgment of recent months of intelligence estimating about Vietnam, administration and intelligence analysts said, was that both Hanoi and Saigon were still unwilling to risk the compromises necessary for a political settlement and that Hanoi's continuing objective was to gain control of South Vietnam by force.

In September, the intelligence services, in a policy paper, pre-dicted that the chances were better than even that Hanoi would open a full-scale offensive in the dry season, beginning this mouth. Then in December, that estimate was updated and the odds re-

On the initiative of Luxem bourg, the three Benelux nations urged that for an initial period only the three countries with the most acute regional problems should receive money from the fund. They proposed that at a later date other members would be entitled to receive some of the fund's resources,

This suggestion was also well received by other countriesthough none of them were prepared at this stage to commit themselves fully to this idea until the European Commission officials had evaluated the proposal in hard cash.

The ministers are scheduled to continue their discussions and will tackle the subject of a common energy policy for the community and how they should respond to Mr. Nixon's invitation

Egypt Sends Plan to Israel

(Condutted from Page 1) newsmen here today, sald: "These are the toughest negotiations I have ever been involved in the most complex, but I like the peoeasier than Vietnam." Mr. Fahmy, who was sitting be-

side him on a hotel terrace, remarked to American reporters:
"You know that when your secretary of state puts his fingers in something it usually succeeds."

Mr. Kissinger and Mr. Fahmy gave several informal briefings to newsmen. During one of them, Mr. Kissinger said that he now expected to be back in Washington early in the coming weekend, whereas he had originally expected to be home tomorrow or Wednesday.

Mr. Fahmy agreed with a reporter who suggested that the line to which Israel had proposed its own withdrawal in the Sinai Peninsula was not satisfactory to It could not be satisfactory

because Dr. Kissinger is going back with an Egyptian map and other related language which together constitute a proposal for disengagement," he said. Not a Counterproposal

He explained that this did not mean that the Israeli plan had been rejected, and said that Egypt's plan should not be regarded as a counterproposal. Mr. Fahmy said that the Egyptian plan that Mr. Kissinger was taking to Israel was in clear-cut language." He added : "There must be no bickering again as there was over the second point of the six points"a reference to the troop-disen-gagement section of the Nov. 11

Egyptian-Israeli cease-fire agree-Asked whether ships destined for Israel would be able to use the Suez Canal if and when it were reopened. Mr. Fahmy said: 'In fact, they do not need it at

Mr. Fahmy said that Mr. Kissinger would go to Luxor—a trip he had originally planned for today-when he comes back here from Israel.

Asked about his own projected visit to Moscow, last scheduled to begin on Wednesday or Thursday, Mr. Fahmy said: "I am going as soon as the secretary of state leaves."

Syria Reportedly Captured Radar

TEL AVIV, Jan. 14 (Reuters).

—Israell military sources said last week that Syria captured some sophisticated U.S. electronic and radar equipment when its troops took an Israeli outpost on Mount Hermon on the first day of the October war. The sources said the Syrians landed inside the perimeter fence of the fortress in helicopters

bearing Israeli Air Force mark-The sources also claimed that Soviet technicians were with the

Syrian troops.

Vitriolic, Authoritative Attack

Pravda Assails Solzhenitsyn **But Avoids Repression Threat**

By Robert G. Kaiser

MOSCOW, Jan. 14 (WP).—The Soviet regime today published an authoritative and vitriolic attack on author Alexander L Solzhenitsyn, but again avoided an opportunity to threaten him with new repression.

The attack appeared in Prayda, the Communist party newspaper.
Under the headline The Path
of Betrayal, the article accused
Mr. Solzhenitsyn of being a traitor, a counter-revolutionary, a falsifler and slanderer, an "internal emigrant," a provocateur and a defector to the camp of the enemies of peace, democracy and socialism."

Any one of these charges could serve as the basis for legal action against Mr. Solzhenitsyn in the Soviet courts, but the article was pointedly silent on this issue. oreover, it characterized Mr. Solzhenitsyn's transgressions as long-standing—as though nothing in his new book, "The Gulag Ar-chipelago," was fundamentally worse than his earlier writings. Since he was not punished for

those earlier works it seems reasonable to infer that the authorities are still not planning to punish him for "The Guleg Archipelago." This inference cannot be made with certainty,

No Capital for West

"Those gentlemen in the West who are earnestly praising Solzenitsyn to the skies." Pravda said, will hardly make any capital in this unseemly business, for the loathsomeness and pettiness of this creature are too glaringboth in the political and the moral sense. "As is known," Prayda went on,

"the Soviet people and the Writers' Union have repeatedly warned Solzhenitsyn that his behavior, which cast ignominy on the title of Soviet citizen, was inadmissible. But Solzhenitsyn heeded nothing and learned nothing. He was and he remained an anti-Sovieteer and anti-Com-

Reviewing several of his works Prayda alleged that Mr. Solzhenitsyn invariably took the side of the enemies of the Soviet system. In "The Gulag Archipelago." that World War II "disclosed to us generally that the worst thing on earth is to be a Russian."

Different Pseudonym

Today's attack on Mr. Solahenitsyn is probably the harshest ever published in this country. It is also the longest and most authoritative rebule to the writer since December, 1970, when Pravits criticised him after he won the Nobel Prize for Litera-

On that occasion, Mr. Solzhenitsyn was lambasted in a long article signed "I. Anlexandrov," a level authorship. It led to speculation that Mr. Solzhenitayn might be arrested. Today's article was signed "I. Solovyev," also a pseud-onym, but one lacking the special cachet of Alexandrov.

Until today Soviet comment on "The Gulag Archipelago" consist-ed of articles distributed by Tass, the government news agency, but unpublished in the Soviet press, of criticism broadcast on Soviet television and of stories (inspired by the original Tass material) reprinted in Soviet papers from Communist journals in East and West Europe.

It took Pravds 17 days after the appearance of "The Gulag Archipelago" in Paris to produce an authoritative Soviet comment. And this comment was somewhat confusing, because its harsh damnation was not accompanied by any threats to Mr. Solzhenitsyn. Soviet propagandists have already said the general public does not understand why Mr. Solzhenitsyn is not severely punished. Today's Pravda article may add to that

Uncertainty Seen The 17-day delay and the nature of today's attack suggest some uncertainty in the Soviet leadership as to how to react to "Gulag." This impression is re-inforced by the fact that the main theme of the first official comments on the book-that it was being used to disrupt East-West

2 Turkish Parties Held Ready to Form a Coalition

ANKARA, Jan. 14 (UPI).—Republican People's party leader Bulent Ecevit is awaiting presi-dential permission to set up a coalitica with the National Salvation party that would end Turkey's three-month-old government

The nation has been run by a caretaker government since the Oct. 14 national election failed to give any party enough votes to govern alone.

Mr. Ecevit told newsmen that he and Nejmuddin Erbakan, tho National Salvation party leader, had finally agreed on a coalition. We have reached an under-

standing and you can take this as a Verbal declaration that we are ready to form a coalition," Mr. Ecevit said after an eighthour meeting with Mr Erbakan "I am now waiting for the president to call me and empower me to form the government."

President Fahrl Koruturk held separate meetings with Mr. Ecevit and Mr. Erbakan later in the day and political sources said he might issue a statement tomor-

detente and to wage "paychologie al warfare" against the Sout Union—is skipped over lightly

today's authoritative article

concentrates on discrediting M

. Solzhenitsyn in the eyes of Sovie

readers. The article explicitly recon firms the Soviet Communic party's "uncompromising citi ity associated with the cuit o personality" - official shorthand for the mass killing and repressions of the Staliner Those "violations of legality" and the principal theme of "The Gg. ing Archipelago."

The article said Mr. Solzhe syn erred by ascribing the crimes to "the very nature of st. cialism," instead of recognism them as "a departure from the norms of socialist society."

Vote Is Seen Near in U.K. As Talks Fail

(Continued from Page 1)

cautioned against optimism one the TUC proposal, the talks took had raised hopes for an end to the present impasse. Mr. Hest has repeatedly insisted that the miners must settle within Siege-1 the present phase of his present and incomes policy.

After the talks, Lionel Mura the general secretary of the Till said the government gave no sign that "it is prepared to go any distance beyond its self-impos Stage-3 in order to get a reason able and acceptable settlement the miners' claims." He adde that government ministers de played exaggerated fears show the willingness of unions to accer the plan.

Into the Future

"We had to satisfy them on the but apparently failed." Mr. Mr. government to decide whether uses an offer like the TUC's get Britain working again persists in its policy of three-t working weeks stretching aim into the indefinite future."

Speaking for the government William Whitelaw, the emple ment secretary, sought to imp that the proposal was still aik He said government leaders wa "think about our position" as added that "we would consu the possibility of further me

cettlements outside Stage-3.7 h said. "After all, between the settled under it. That is a co siderable number.

The next step will come We nesday when officials from m than 100 unions affiliated w the TUC meet to discuss the dustrial crisis and the propo for restraint. If the idea is his endorsed at that meeting. Whitelaw said, the governmen willing to discuss it further.

Paris Metro Strike Called Over Killing PARIS, Jan. 14 (AF) Personnel of the Paris subs

system were ordered today to on a five-hour strike tomo -from 10 a.m. to 3 pmprotest the killing of an empl recently

The strike will coincide with man's funeral. A delegate of employees met with the director of the subway system to and complained of 406 attacks the last 18 months. There w also 455 muggings of travel the employees said.

Italian Paper Price Rise ROME, Jan. 14 (Reuters). government has authorized and crease of 10 lire (1.6 cents) in price of daily newspapers, it announced here today. Pa now will cost 100 lire.

E. Jan. 14 (Reuters) .- At 00 persons are killed and njured in Italy every year ny 4,000 automobile accicaused by fog, police said

The Florida justices saw their support of the law as an enhancement of the First Amendment for all citizens at a time of

growing concentration in press

The Supreme Court agreed to hear the case in a brief, routine order. It will be argued later this term with a decision expected by

The largely ignored Florida law was given prominence in 1972 when state legislative candidate Pat L. Tornillo invoked it in an attempt to reply to two editorials

in the Mismi Herald opposing his In other action today, the Enlarged its reconsideration of anti-obscenity laws by agreeing to hear a case involving the

federal statute against mailing obscene material. The court said it would hear the case together with an appeal, accepted for re-view last month, by an Albany, Ga., movie theater operator convicted under a state obscenity law for showing the film "Carnal Knowledge."

• Agreed to decide whether thousands of Mexican laborers can legally commute to the United States for seasonal farm work. The court also accepted for review a companion case challenging the legality of daily commuting by Mexican laborers.

Largest Airport Put In Service at Dallas

GRAPEVINE Texas, Jan. 14 (UPI).-The Dallas-Fort Worth airport here, a 17.500-acre complex that is the world's largest airport, today staned scheduled services. The first arrival was an American Airlines Boeing-727 jetliner from Memphis, Tenn. Officials of the \$700-million

airport, which took 10 years to plan and build, said that more than 2,500 flights will be logged during the first week of operations. Formal opening ceremonies in September were highlighted by the arrival of an Anglo-French Concorde supersonic air-

A rope and a 40-foot ladder were used to get close enough to lasso the antiers. Once on dry ground, he shook himself free and rambled off to the nearby woods.

Finding Based on No-Contest Tax Plea

Judges Call on Maryland to Disbar Agnew ANNAPOLIS, Md., Jan. 14 (AP). and resigned from the vice-presi-

-A special three-judge panel recommended today that former Vice-President Spiro T. Agnew be dency.

The Bar Association had asked the three judges to disbar Agnew. disbarred from the practice of law in Maryland.
The three Circuit Court judges

said that Agnew's evasion of income tax, acknowledged in a no-contest_plea. was "deceitful and disbonest" and "strikes at the heart of the basic object of the legal profession." "We shall therefore recom-

mend his disbarment. We see no extenuating circumstances allowing a lesser sanction," a 14-page recommendation said. Agnew's office declined com-

ment on the recommendation. The recommendation goes to the Maryland Court of Appeals, which makes the final decision on whether to bar Agnew from the practice of law. November Action Disciplinary actions were filed

by the Maryland Bar Association

in November after Agnew pleaded no contest to a federal tax charge

Nixon Reportedly Told in '72 Of 'Spy' Leak to Adm. Moorer

was this operation-investigated by Mr. Young-that Mr. Nixon had in mind when he talked of important "national security" considerations that prompted him last year to urge that the Justice Department stop its inquiries into the "plumbers"—a White House group whose role was publicly announced to have been the "plugging" of leaks to news

Last month, The New York Times reported that some of Mr. Nixon's other "national security" considerations—including the possible exposure of a Soviet spy and a CIA informant—had left many government officials unconvinced of the validity of the President's belief. One well placed source said then that the President's concerns were not "national security but Nixon security."
Others, yesterday echoed those

Study Absolves Abortion of Role In Menta! Upsets

BALTIMORE, Jan. 14 (AP).-The belief that more psychological problems afflict women who have abortions than those who have their babies is apparently a myth, according to a professor who worked on a Johns Hopkins Hospital study

"It would appear that there is no evidence of greater psychopathology among women seeking abortion and those who do not." Dr. Wallace C. Oppel, associate fessor of maternal and child health, said. An independent study obtained similar findings,

he said. The psychological results of birth or abortion were "startlingly similar" among a group of nationts who had abortions and a matched group who delivered healthy babies, according to report on the study published in "Family Planning Perspectives. a publication of the Planned Parenthood organization.

Patients were divided into groups of women who obtained early suction abortions, had late saline injection abortions or gave birth. The Johns Hopkins group interviewed 373 women who went to the hospital for abortion or delivery between October, 1970. and February, 1972. The study group re-interviewed 211 of the patients about a year after their

A-Plant in Soviet North

MOSCOW, Jan. 14 (UPI).-The Soviet Union has begun operating the world's northernmost nuclear power station—a plant on the Chukotka Peninsula in the Soviet Far East, the government newspaper, Investia, said today. The plant serves a mining settlement. cauce of the alleged military spying activities, with one of-ficial categorizing the military activities as "nothing more than a bunch of paranoids running after each other."

Others closely connected to the year-long Watergate investigation cautioned, however, that, as one put it, "there's a very critical area in there that hasn't come out yet," a reference to the alleged military spying activities. Another official said that he

had heard of "other things" regarding Mr. Young's inquiry that "strike me as better national security reasons."

Threat Downplayed Some former National Security Council aides, while acknowledging that all of the facts about Mr. Young's investigation have been made known, insisted nonetheless in interviews that the alleged military-spying activies were not necessarily sinister.
"Neither the State Department

nor the Pentagon knew what was going on," a former government aide said. "And they both wanted to know what the state of play He added that the State De-

partment's equivalent to the mili-tary activities would have been the relaying of any possible in-formation about Mr. Kissinger's activities during overseas visits to William P. Rogers, then the secretary of state,

ever, had asked the pancl to merely suspend him from practicing law, arguing that his miscon-

duties as a lawyer. Agnew told the judges that he had at no time enriched himself at the expense of his public trust and that there was nothing to indicate that he would not faithfully and honestly represent his clients as a lawyer.

But Circuit Court Judges Shirley B. Jones, Ridgely P. Melvin jr. and William H. Mc-Cullough said Agnew's conduct was harmful to the proper administration of justice.

Respondent Is Unfit'

"In our opinion, the proper administration of justice, the proper respect of the court for itself and a proper regard for the integrity of the profession compel us to conclude that the respondent is unfit to continue as a member of the bar of this state," the recommendation said. The three judges said their

recommendation was based solely on Agnew's no-contest plea to the

tax charge. They said they did not take into consideration any of the allegations made by the Justice Department in Agnew's U.S. District Court appearance on In a 40-page statement evidence, federal prosecutors had

alleged that Agnew was involved in a system of kickbacks to Maryland politicians from architects and engineers doing government

Litton Is Loser In Navy Appeal

NEW ORLEANS, Jan. 14 (AP). -A federal appeals court has ruled that the Navy does not have to pay Litton Industries about \$3 million weekly for a con-troversial order of long-overduc assault ships.

The 5th U.S. Circuit Court of Appeals overturned a lower-court injunction that had ordered the payments to continue indefinitely. It said the lower court had no jurisdiction to order the injunc-

At issue is a \$1.2-billion contract made in 1969 between the Navy and Litton for five helicop-ter-carrying assault vessels. For the first 40 months, the Navy was to pay a set amount, based on costs actually incurred by Lit-After that time, payments would be made on what percentage of ships were completed, with overpayments to be return-

After one contract extension the Navy demanded that Litton abide by the contract and return an estimated \$54.7 million in overpayments. Instead, Litton went to court and got the injunc-

Plan to Reduce Its Power Seen Factor

By Anthony Ripley WASHINGTON, Jan. 14 (NYT).

-Dissension within the Atomic Energy Commission has produced a series of bureaucratic struggles and personality conflicts at the top levels.

For the first time in more than a decade, the commission members themselves are deeply split, all sides agree. The split seems to turn more on personalities than on issues, with some of the commissioners feeling that the chairman, Dr. Dixy Lee Ray, is out to get them. She, in turn, indicates that she feels she has been stabbed in the back.

A number of other developments have shaken the normally quiet, frequently secret activities of the AEC, which spends \$3 billion a year developing atomic power for war and peace. Among such de-

A number of retirements and resignations at top levels have stirred some animosity within the powerful Joint Committee on Atomic Energy in Congress and produced changes in the AEC.

• A bill, passed by the House and pending in the Senate, would convert the AEC into an energy

research and development agency with a single administrator. It would create a separate nuclear energy council to handle the regulation of nuclear power's pracetime uses, changing bureaucratic patterns set up over 27

· Chairman Ray, in producing duct was not connected with his two reports for President Nixon, has used a separate staff and not gone through the regular channels or submitted them to the commission for approval first. She said that she was specifically requested to do it that way by the President but others on the com-mission see it as one-man rule.

Top officials at the AEC and its regulatory branch feel that proper regulation of nuclear electric power plants may suffer in the rush to meet the energy crisis. They are fighting to restore funds trimmed from

Dr. Ray, in an interview, denied that she had forced changes at the top levels in a type of housecleaning, saying that most were normal retirements in an agency now more than 25 years old. In discussing the pending bill, which she and the Nixon admin-

istration support. Dr. Ray said that it could lead to the end of the AEC as it is known today. "Under these circumstances, there is, no doubt, a great deal of nervousness," she stated. "Change is anathema to a bureaucracy. It's a wonder to me the situation is not

Lisbon Names Spinola Vice-Chief of Staff · LISBON, Jan. 14 (UPI).-Gen.

Export-Import Bank Warned On U.S.-Soviet Gas Deal Loan

told the Export-Import Bank yesterday it might jeopardize its entire future if it continued to consider a \$49-million loan for a U.S.-Soviet gas deal.

In a telegram sent to the benk today, they said: "Any favorable commitment on this loan application would be a willful and flagrant move on the part of the bank to frustrate the clear and overwhelming will of the U.S. Congress."

Noting that a bill to extend the bank's life and increase its lending authority is before Congress, they said unilateral ac-tion by the bank on the loan might peopardize the entire future of the Export-Import

The telegram was signed by Rep. Richard H. Ichord of Mis-

WASHINGTON, Jan. 14 (AP). souri. Rep. Joseph E. Karth of -Five Democratic congressmen Minnesota. Rep. John E. Dent of Pennsylvania, Rep. Richard H. Fulton of Tennessee and Rep. Mendel J. Davis of South Carolina. The \$49-million loan would

finance exploration for a possible \$10-billion U.S.-Soviet natural gas project in Siberia. This is one of two proposed gas projects in Siberia that are by far the biggest U.S.-Soviet trade deals being considered. The five Democrats said the

will of Congress is expressed in an amendment prohibiting such U.S. credit loans for U.S.-Soviet trade until the Russians permit Jews and other citizens to

emigrate freely. The amendment has been passed by the House and is cosponsored by more than 80 of the

Nader Denies Simon's Claim That Oil Shortage Is Real

WASHINGTON, Jan. 14 (AP). -Federal energy director William E. Simon told a congressional panel today the nation is threatened with "dangerously low levels" of petroleum products, but consumer advocate Ralph Nader said the world is "drowning in

Their sharply conflicting views were presented in testimony be-fore a House-Senate economic subcommittee looking into the accuracy of government chergy statistics. The subcommittee is headed by Sen, William Prommire,

While many doubt the accuracy of the data being provided by industry." Mr. Simon said, "there is no doubt in my mind

Doctor Accused Of Mercy Killing On Trial in N.Y.

MINEOLA, N.Y., Jan. 14 (AP).-The former chief surgeon the county medical center here went on trial today, charg-ed with willful murder in the alleged mercy killing of a cancer

Vincent A. Montemarano, 33, was chief resident surgeon at Nassau County Medical Center in December, 1972, when he al-legedly injected a fatal dose of potassium chloride into the patient, Eugene Bauer, 59. Mr. Eauer was suffering from neck and throat cancer, heart disease and pneumonia. He was in a coma and had been given less than 48 hours to live.

Montemarano signed a certificate citing cancer as the cause of Mr. Bauer's death. After an investigation by the Nassau County District Attorney's Office, he was indicted for

The body of Mr. Bauer, a retired Long Island Reil Road worker from Hicksville, was exhumed but an autopsy failed to show any trace of potassium chloride.

The district attorney, however, said he had evidence about the alleged fatal injection. that we do indeed have a serious

shortage. "As of Dec. 29, the American Petroleum Institute reported we have only slightly over 30 days' products. The shortage caused by a full effective embargo will quickly reduce these to dangerously low levels unless we get quickly to reduce demand and equitably allocate the available supplies," he said.

President Nixon met later today with Mr. Simen for what was described as a full review of the fuel-oil situation. The ad-ministration's fuel-oil and gaseline allocation program will be published tomorrow morning.

'Unarmed Robbery'

Mr. Nader described America's energy problem as "unarmed robbery by oil companies in collution with government support." Denying that a shortage exists, he said everything that has happened in the name of the energy crisis has been to the advantage of the major petroleum com-

panies. "The world is literally drowning in oil." Mr. Nader said "Any government agency can create a shortage simply by announcing

He said geologists believe that less than 25 percent of the world's oil reserves have been discovered and that the reserve figure sup-plied by oil companies and the government actually represents only about 10 percent of real

proven recerves. Mr. Simon said the government should be able to require oil companies to reveal much more information on their oil reserves and marketing. He said:

"All of our current sources of data are voluntary and for many of the programs we now operate this is simply not enough. We now clearly need mandatory re-porting systems and mechanisms to check and enforce their proper

operation." In New York, Consolidated Edison ordered a 5 percent voltage reduction today because of what the company called a critical shortage of fuel oil. The utility serves the New York metropolitan area.

Credibility in Crisis

The American economy is standing up reasonably well to the present stage of the energy crisis. By comparison with other industrial communities, the impact has been mild. But the people's confidence in their government has been shaken by Vietnam and Watergate, and it is not surprising that those who have to rise before daybreak, park in line for gasoline, curtail many accustomed activities, argue with landlords about the delivery of heat and see jobs ebbing away while prices rise, should question the basis for their troubles.

What is more surprising than the fact that some should ask if the crisis is real is the degree of acceptance of its actuality and conformance with measures intended to alleviate it. The initial reaction of independent truckers to rules and prices that cut into their incomes was unique in its violence, and temporary. The high tempers that boil over at crowded filling stations could be matched at bargain counters or subway stations during the rush hours.

Thus far. Americans are meeting their share of the energy crisis with less petulance than might be expected from the image of spoiled affluence which many of them have accepted as a reflection of their society.

There are underlying suspicious, however, which pose some threats for the future. This is particularly true because of the diffuse and uncertain nature of the crisis itself. The possibility that dealers in petroleum, from the man at the gasoline pump back through all levels of sale and distribution to the great companies that produce the raw material and refine it, will make undue profits, or favor one segment of American society over another, is always present; the distinction between acquiring necessary stockpiles and mere greedy hoarding can be very narrow; the words of government officials have little inherent credibility these days and the actions of their agencies little acceptance as necessarily wise, informed or efficient.

And, of course, there is the relationship of the whole issue to foreign affairs and a global economy which is complex and, to most citizens, arcane One can imagine that 20 years ago, this relationship might have offered occasion for demands that drastic action be taken overseas, diplomatic or even military. Today, the result might be in the direction of increased isolationism. In fact, neither of these tendencies has found real voice as yet. The dangers of extremism in foreign politics, like those of economic disruption at home, remain latent.

Much will depend on events. If adjustment to the immediate energy problem seems to be progressing equitably, and in accordance with recognized necessities, and if this is geared into the basic shortage of power. the United States shows good signs of adapting to its still extensive rescurces. But if either world politics or politics at home become too blatant a factor, if there are evidences of fraud or excessive profits by and for the few at the expense of the many, there will be trouble.

Nixon's Oil Conference

Since the beginning of the oil embargo three months ago, the United States has shown a dismaying lack of concern for the embargo's effects on the rest of the world. The prevailing attitude in the world's capitals, unfortunately including Washington, has been a reversion to the coarse and blunt policy of every man for himself. Now, at last, there is a more hopeful note. President Nixon's announcement of an international conference of oil-importing nations is at least an expression of interest. It is at least an acknowledgement that the United States has a very great stake in the effects of the new oil prices on other countries'

Neither Mr. Nixon nor Secretary of State Henry Kissinger seems to have any large and comprehensive solution to place before this meeting. Among diplomats there is a firm rule, based on much unhappy experience, against calling high-level conferences tended to go. But in this case, the violation of the rule brings one clear benefit. Having committed itself to a conference, the Nixon administration is finally forced to decide on an international understanding it wants.

The question is hardly a new one. Discussions among the oil-importing nations have been going on ever since the beginning of last summer. They have generally addressed the issue of a world shortage or an embargo by the producers. The discussions had been limping along for more than three months, in fact, before the Arabs actually imposed the embargo. But these talks always broke down at the same point

The United States, and some of the other countries with domestic sources of oil, wanted to talk about sharing only the imported oil. But the other countries, with no domestic sources, wanted to talk about sharing all available oil. The issue was, you might say, whether we were going to share their oil, or ours as well. The same dispute has impeded any sharing agreement even within the European community. Several countries, notably Britain and Norway, have the promise of very substantial oil from the North Sea. Most of the others will continue to be entirely dependent on imports. This deadlock is the immediate reason why the industrial nations drifted, without common purpose or preparation, into an emergency that all of them had foreseen at least as a hypothetical possibility.

The deadlock continues. There is not much likelihood that Secretary Kissinger could offer to share Texas oil with Japan or Europe while shortages persist here. But the question is no longer likely to come up

in quite those terms. A strong sharing agreement would be, in effect, an economic alliance against the Arabs. Japan has ruled out that strategy. Japanese participation is crucial to Mr. Nixon's conference, and Japan accepted the invitation only on the assurance that it would not lead to a confrontation with the Arabs. To the contrary, Mr. Kissinger says that this first conference is intended to lead to a later and larger meeting which includes the oil producers.

Some of the agenda for the first conference can already be dimly seen through the mists. With the drastic increase in world oil prices, the shortages get less important but the strain on the international payments system gets much more important. People in the rich countries have been talking for some time about the possibility of using oil money for industrial development in the Arab nations. Both oil importers and exporters certainly have an interest in a paywithout knowing exactly where they are in. ments mechanism that can actually work and not spiral off into arithmetical impos-

> Whatever else happens, this conference will probably mark the beginning of the end of the role of the international oil companies as independent brokers. None of the governments, including the United States, is sure that it fully understands what the companies are doing. Governments do not like to find themselves at the mercy of the heavily-velled decisions of private companies. The conference, when it convenes, is likely to take up the matter of data-the figures on shipments, prices and costs that the industry has traditionally held in great secrecy. Because the oil companies are multinational. they have usually managed to evade precise answers to some of the more interesting financial questions. But now the governments are beginning to get together. The result is not necessarily going to make the companies' operations more efficient, but it will certainly make them more public and more comprehensible.

The oil-consuming countries are now going to have to begin dealing directly with the oil-producing countries. This development will not necessarily increase international harmony and good will. The companies, as middlemen, have absorbed a lot of friction and complaints over prices and concessions that the diplomats will now have to deal with. It will not be comfortable for the industrial nations' governments. But they are under great and justified political pressure at home to take a larger responsibility for the flow of a vital commodity, and they have no choice.

U.S. Pressure on Israel?

It remains to be seen whether Henry Kissinger will succeed, during his third trip to the Mideast, in working out a compromise acceptable to both sides. It is already clear that he is prepared to serve as mediator. It is also clear that, with his assuming such a role, the Israelis are in danger of being forced to make greater concessions than the Egyptians, because Kissinger can exert

greater pressure on Jerusalem than he can on Cairo. Israel is largely dependent on the United States, while the Egyptians depend mainly on the Russians. Perhaps this explains why Moscow has, to such a surprising degree, let Kissinger take on the active role in the negotiations and has itself seemed content to remain more or less on the side-

BOSTON-By his performance as the Watergate special prosecutor, Leon Jaworski has quieted early questions about his ability to be independent from the President who appointed him. He has held together the staff picked by Archibald Cox; he has pressed the investigations: he has kept his distance—and his -from the White House.

All that must be acknowledged as preface to consideration of the important statement that Jaworski has just made. He said that he could "see no way at the present time" to make material obtained from the White House available to the House Judiclary Committee for its impeachment.

There is no doubt of Jaworski's good faith in reaching that position He had obtained presidential documents and tapes by asking on behalf of grand juries, he felt, and he was therefore bound by personal honor and the rules of grand jury secrecy not to disclose them else-

Immunizing Nixon

Nevertheless, it must be recognized that the view he indicates raises extremely serious problems for the impeachment inquiry. Indeed, the unintended result just could be to immunize President Nixon from any effective retribution for wrongdoing. Consider the burden placed on the House committees's impeachment staff, headed by John Doar. The exceedingly skilled lawyers of the special prosecutor's office have worked for six months on all the threads of evidence and they are just about ready to ask the grand juries for major in-dictments. If Doar and his colleagues have to start at ground zero now, they would face an enormous task in trying to collect the evidence airesh.

There is a severe problem of time. Doar may well ask the President's lawyers to turn over relevant information voluntarily, but it is already indicated that the answer will be no. If the House then grants needed subpoens power, the White House lawyers will doubtless contest that, too. In the end the courts would almost certainly find that the constitutional process of impeachment carries with it an

Mints's allegation:

As a former vice-president (loan

but the litigation could take Of course there is a mass of material available apart from what the special prosecutor has got from the White House, And there are numerous possible grounds for impeachment that rest on published facts, for example Nixon's 1970 approval of a secret security plan authoriz-ing the use of illegal wiretaps

But for sound political as well as legal reasons the House com-mittee will surely be intent on exploring the leads closest to the President-any evidence linking of Watergate and the cover-up. The committee will be looking for public support; and much of the public, for all its disbelief in that, and to see in the dilemma Nixon, has indicated a reluctance another if unwitting cover-up. to undertake impeachment with-

crecy is not an absolute in our law. Judges can release the minutes of grand jury proceedings for a variety of reasons. Federal testimony is communicated to state prosecutors, defendants may have claims on it, and so forth. The ethical and legal restraints that Jaworski feels apply to him as prosecutor would not be the same in relation to Judge John Sirica, and Jawor-

ski could seek a ruling from him. The point is that judge and prosecutor and all concerned have obligations to a larger public interest, to Congress, to the country, to the constitutional process of impeachment. It would be extraordinary if the fact that jury stood in the way of an impeachment proceeding. The public is likely to understand

Israel's Sinai Oil

here ests fish."

By Rowland Evans and Robert Novak

Wexplosion in the price of Middle Eastern oil is adding a dangerous new obstacle to Secretary of State Henry Riccinger's efforts to end the 25-year Arab-Israeli war.

The reason lies in Israel's prospective "loss" of close to \$1 billion a year of crude oil in the Sinal Belayim field selzed from Egypt in the 1967 six-day war and pumped by Israel ever since.

Israel is now staggering under a huge foreign debt, rising inflation and the exorbitant costs of the Yom Kippur war. Now it faces the necessity of buying foreign oil in place of the lost Sinai production at prohibitively expensive prices.

That price has simpst quadrupled since the Yom Kippur war and is now fluctuating in the range of \$12 to \$17 a barrel. At its present consumption rate, and at a cost of only \$15 a barrel, Israel would be shelling out over \$700 million a year just to keep even with its present requirements of 130,000 barrels a

'Hottest Sleeper'

"The hottest sleeper in the Middle East today is not the Arab oil embargo or the Suez Canal." says one shrewd oll man. "It's how Israel can be forced to give back the oil wells it took from Egypt seven years ago." ..

The wells seized in 1967 are

located about 100 miles south of Suez city along the east coast of the Gulf of Suez both on land and in shallow gulf waters. Other wells in Suez Gulf waters are still in Egyptian hands In 1969, King Resources of Denver, a major industrial and mining concern, sent an oil rig from Canada toward the Gulf of Suez under contract to Israel for offshore drilling. Before it arrived however.

the Italian government, which holds the major concession in Sinai's Belayim field, privately but forcefully protested that it would violate international law. Israel backed off its illegal exploration and the rig returned to Canada.

they would have chosen a dif-The explosive question of the Sinal oil has not yet reached the negotiating table in Geneva T: CARL WEDEL Indeed, it will not become a major

WASHINGTON.—The sudden issue until after the first Israeli-Egyptian agreement has been achieved; the separation-of-forces deal which Kissinger is trying to negotiate on his current visit to Egypt and Israel No matter what deal Kissinger

can make to move the Israell Army out of its positions on the west bank of the Sues Canal, that preliminary withdrawal will not include giving up the rich Belayim oil field. That would wait for the second or third stage of what President Nixon and virtually the entire world want Israel to do: withdraw from all but insubstan-tial portions of the Egyptian territory seized in 1987.

But once that stage is reached. Israel will have only one apparent source for replacement: Iran. It is inconceivable that any Arab oil state would agree to sell oil to Israel until after Israeli withdrawai not only from the Sinal but also from major portions of the West Bank of Jordan and the Syrian Golan Heights—and perhaps not then.

Doubtful

In fact, so long as the laste of the Palestinian refugees is unresolved, it is dubious in the extreme that any Arab state would supply of to Israel whose conon has increased more than 50 percent since the 1967

The fear in Egypt, still un-ublicized is that Israel's intention to hang onto the Belayim

field is growing underes here. This may explain it blatant threats which have appearing recently in Mohs Hassanein Helkal's newspaper. Russians Seen Building Fleet Of Big Missile Submarines

By John W. Finney

WASHINGTON, JEE, IT WALL.

The Soviet Union is expanding nuclear its capacity for building nuclear and starting work on submarines and starting work on a new larger class of missile tagon officials.

The developments, not com-

NATO Sticks To Policy on Troop Cuts

still wants U.S. and Soviet forces to be cut first under an agreement on troop reductions in Central Europe, a top NATO official

said here today.

The 19-country conference will resume later this week after a one-month recess.

The official, Bryan Quarles van Ufford, who heads the Dutch delegation, said at a news con-ference that the two-phase NATO

plan could lead to an initial agreement this year or at the beginning of 1975.

Under the plan, the first phase would be a reduction of U.S. and Soviet forces and the second phase would put a common ceil-ing on all ground forces of NATO and the Warsaw Pact in Central

Europe.

Mr. Van Ufford said that, since the interests of both East and West were served in the cuts, he was optimistic that a "common approach" to a solution would be

The Russians and their Eastern European allies proposed in the earlier sessions that U.S. and Soviet forces should be cut at the same time as those of the other

forces Date Being Set

Mr. Van Ufford said talks were being held to determine the exact date when the conference would be resumed this week.

The positions of East and West : were considerably apart when the talks recessed Dec. 13 with the East proposing equal reductions and the West countering that this would perpetuate East-ern superiority in Central Europe. Mr. Van Ufford reiterated that in the West wanted an "equal outcome" of the talks, meaning greater reductions of Eastern forces and armaments than those of the West, He said the Warsaw T Pact has 935 000 men in the area against NATO's 770,000. As to tanks, the Warsaw Pact had 15,000 and NATO 6,000, he said.

An American official said rlier there were 193,000 U.S. idiers in Central Europe, com-red with 460,000 Russians. As to the Eastern wish to inide nuclear forces in the discus-oil ons. Mr. Van Ulford said this day. uld only complicate the talks. 'The danger of escalation to clear war." he said, "arises less apons in the area than from instability which is inherent the present disparities in

pletely unexpected, provide fur-ther evidence that the Soviet Union was determined to challenge the long-standing superiority of the United States in nuclear submarines, Pentagon officials said.

The appearance of the larger class of Soviet missile submarines was first hinted at last week by Defense Secretary James R. Schlesinger He cited that development and the Soviet testing of four new intercontinental bal-listic missiles as proof that Moscow was showing a "great deal of vigor" in developing new strategic weapons.

The Defense Department is expected to stress such Soviet weapons developments as it seeks to defend an increased military budget calling for continued construction of the \$1-billion Trident submarines and development of new strategic warheads

Maximum Level

Defense officials said that it was becoming increasingly evident that the Soviet Union was intent on building missile-launching submarines up to the maximum level permitted under last year's interim agreement with the United States on strategic weapons.

The new class of submarines was described as somewhat larger than the Delta class which joined the Soviet fleet in 1972. But the key difference is that the new class is expected to carry 16 ballistic missiles with a range of 4,000 miles, compared with 12 on the Delta-class submarines.

The five-year interim agreement in essence placed a ceiling on the number of offensive missiles that each side could possess. The Soviet Union, by dismantling some of its older missile sub-marines and land-based missiles, is permitted to build up to 62 submarines carrying 950 mls-

U.S. Strength

The United States now has 41. missile-launching submarines—15 of the original Polaris class, 20 the new Poseidon class and being converted to carry the 2.800-mile Poseidon missile. The Soviet submarine missiles, so far, are equipped only with single warheads, while the U.S. submarine missiles have multiple independently targetable warbeads, known as MIRVs.

While the U.S. submarine fleet has 656 missiles, it can deliver far more warheads than the Soviet

> Testament version of creation is historical fact. The expedition will search for physical evidence that the Patriarch Noah did, in fact, build 450-loot-long ark as a refuge for himself, his family and the animals he collected "two by two" to save them from the great

evolution and prove that the Old

deluge. Only Survivors

According to the Old Testament, all the world's people are descendants of Noah and his family who, along with the animals, were the only survivors when the ark came to rest near the top of Mount Ararat after the flood waters receded.

In addition to obtaining proof that the ark existed, the Morrises hope to confound the evolutionists with evidence that the earth is not millions of years old, as scientists contend, but has existed no more than 10,000 years, and that the flood was a universal one that inundated the Mount Ararat lies in a highly entire globe.

Russia Senses China Rivalry For Japanese Oil Customers

By Hedrick Smith

MOSCOW, Jan. 14 (NYT),--Oil is the latest bone of contention in the ever-widening rivalry between the Soviet Union and

Moscow, which has long been negotiating with the Japanese for a 20-year oil deal, sharply denounced Chinese efforts to lure away Japanese customers.

In a commentary on the recent visit to Peking by Foreign Minister Masayoshi Ohira of Japan, the Communist party daily Pravda as-serted that Japanese businessmen were right to be wary of Peking's claims that China has raised its annual oil production to 50 million tons and "will shortly be able to sell up to five million tons annually" to the Japanese.

The quick reaction of the Sovict press to the Chinese commercial feelers suggested how sensi-tive Moscow was about Chinese competition for the Japanese

Soviet negotiations with Japanese companies for shipping up to 25 million tons of oil from west Siberia to Japan annually have dragged on for more than two years, but Moscow's hopes of con-cluding a contract have risen since the Western energy crisis because of Tokyo's acute fucl

Basques Protest Banishment to Northern France

SAINT-JEAN-DE-LUZ, France, Jan. 14 (Reuters) .- A group of 106 Spanish Basque refugees including Juan Jose Echave, creator of the separatist ETA movement. today labelled as "unjustified and arbitrary" French moves to have some of them banished from the border area to northern France.

Yesterday five Basque prisoners went on hunger strike in Pau Prison after ignoring an order by Interior Minister Raymond Marcellin assigning them to northern France.

The Basques issued a commuproup here that said: "We consider as totally unjustified and arbitrary all the recent measures taken against us. It is difficult to admit that we can be moved from our homes, our brothers and our work by a simple administrative decision and without any chance of making a legal appeal. We cannot sit back and see our elementary rights sacrificed to the all-powerful myth of 'good neighbors' founded on and Spain."

Tanaka Met In Jakarta by **Protesters**

Police Keep Students From Japanese Chief

By Richard Halloran

JAKARTA, Jan. 14 (NYT).-After quick but quiet stops in Singapore and Malaysia, Premier Kakuer Tanaka of Japan arrived here tonight on the last stop of his Southeast Asian tour and ranimmediately into Indonesia: sindent demonstrators.

Despute a heavy armed guard at the new International Airport here, some of the 800 students broke through the lines and attempted to block the road on which Mr. Tanaka and his host, President Subarto of Indonesia, were driving into the city.

But the soldiers, aided by a decoy convoy that diew the students away, cleared the road and the motorcade armed at the state guest house without mei-

Although the protest was considerably milder than the ones that Mr. Tanaka ran into in Bangkok last week, his conversations with the Indonement, were expected to be the touchiest in his current five-nation tour.

About 12 percent of Japan's oil comes from Indonesia. Earlier today, in Kuala Luinpor Mr. Tanaka delended Jap-ane-e business in Southeast Asia as beneficial to both the Japanese and the Southeata Asians. He also steggested that nations in-this region would do well to copy Japan's efforts to

Valid Criticism

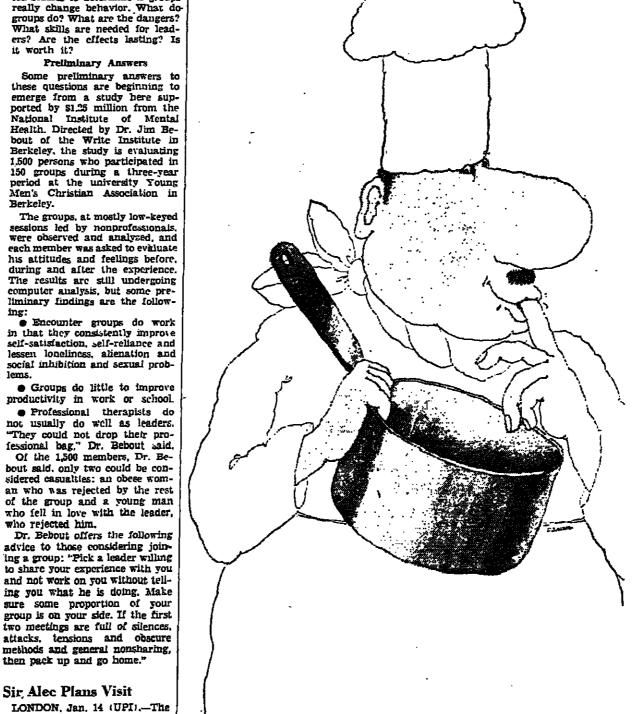

Mr. Tanaka also readily conceded that some of the criticism of Japanece economic activities in tins area was valid. "Japanese businessmen are not infallible." he said, "and not all of them ar<mark>a</mark> divine creatures."

Critics of the Japanese in the Philippines Thailand, Singapore and Malaysia indicated that they objected less to the presence of the Japanese and their impact on Scutheast Asian economics than they aid to the way the Japaness did business.

the basic reasons for the criti-cism. Mr. Tanaka said he thought it stemmed from the speed with which the Japanese had moved into Southeast Asia economically, from language barriers and from differences in so-

Mr. Tanaka's brief stay in Singapore, on Friday and Saturday, was uneventful. A small group of students delivered a letter of protest against alleged Japanese economic abuses to the Japanere there were no demonstrations.

Would you believe airline food that's good enough to eat!

Let's face it, airplane food has never been something to write home about. Wholesome, yes. But interesting? Hardly.

Until now Because Air France decided to attack the problem. in a different way. Our chet's called on a society

known as "La Grande Cuisine Française. It was founded by B master chefs to preserve the tradition of great French. cooking. We challenged them to create

a new kind of airplane food. Interesting, varied, And appetizing, What they come up with is a

series of menus that merit the name Grande Cuisine Française. For example: Ballotino de caneton à l'orange, Gâteau de gigot braisé and

fruits frais; Saumon citron polyre

vert. Poitrine de veau farcie and Gateau noisettine. You can judge them for yourself on any Air France flight departing from Paris. Hot on long

Bringing Up Baby in **High Style**

By Hebe Dorsey

PARIS (IHT).—When Princess Grace came up with a yellow nursery for her daughter Princess Caroline, 16 years ago, it was considered unusual. But nothing much happened to the traditional baby blue and baby pink until Le Petit Faune opened at 28 Rue

Now, thanks to Sylvie Loussier, owner and designer of the shop babies can wear sophisticated Liberty prints set off by unorthodox salmon, slate blue, bronze green, mousey gray and even black.

"Black looks lovely on babies," Mrs. Loussler said. "They have such a pretty, delicate complexion that if anybody can take it, they can. When people tell me black doesn't suit them, it kills me. On the contrary, I think black looks terrible on older people."

She hates acrylic white. "A disaster. It annihilates a child." Pink is fine but, leaving the pastel, traditional pink alone, she prefers flesh-colored pinks and a whole range of dim, yet singing

Next to Face

"A grandmother once stalked into my shop and insulted me," she said, smilling. "'You're making colors for poor little chil-dren, she told me. But I know what I'm doing. I always design

my colors next to a child's face." Mrs. Loussier indeed knows what she is doing. The mother of five children, she started designing clothes for them when she could not find what she wanted

tween 79 and 125 francs, a maxibrassière 80 francs. But she makes up for the prices by having vearly sales and there is one

Putting an End to the Curry Myth

By Dharamjit Singh

MUCH the same way that Chinese cooking a decade ago was thought of in the Western world as "chop suey," curry has imposed its beguling but limited imprimatur on the world's most

inventive cuisine. The numerous recipes called curry are an abbreviation of the word turrearri, which means a stew or ragout with coplous cooking liquor, mild or hot. Curry is the first, the primary step into the realm of India's cuising.

The original Angio-Indian cuisine never ventured further than curry, for palpable reasons. In Bengal, from 1770 onwards, the traders of the East India Company drew on Bengali and Assamese Maggh (pronounced mug) cooks and later Goanese cooks. These experts were often capable of rivaling the greatest chefs in Europe, Western cookery was their forte. Of Indian food they had only marginal notions: the curries of Madras, of Bengal Cannily they played safe with this repertoire and bypassed the renowned cuisine of Agra and Lucknow.

When the British moved to Delhi they had a brief but descing experience of a grand cuisine, the synthesis, with the imperial mark, of the food of many great regions of India. But, the Cordon Bleu region of Indian cookery, the Punjab, alongwith Rashmir and the Pathanlands were a scaled book for the dissolution of the Sibb binesion was book, for the dissolution of the Sikh kingdom was still 50 years in the future. For historical reasons this cuisine, like the core of Madras and Bengal cuisine, never formed a part of "curry."

Semi-Indian Lives

Deihi in 1803 appeared to the British as a symbol of the exotic civilization that had so long bol of the excited the West. Instead of making those ponderous anglicized buildings of Calcutta, they moved into magnificent houses, small palaces that still existed with the nearby Shalimar Garden and the Imperial Jeweled Palace with its five-mile-long walls. The British led semi-Indian domestic lives. They are some of the best food in the world: Indian. The events of 1857, later Victoriana, the arrival of the English woman in full force erased this brief interlude with the real cooking of . dia. Back to the wall with curry again.
This cuisine at Delhi was a part of a tradition.

datable back to 1300 BC, through classic times down to the Mughals. It remained basically the same for its inspirations were the elements not of history but of nature. Also, it ever remained in the home. From emperor to the laborer, the twin passions were cooking and chess. This cuisine never became a thing of restaurants and taverns. There remain today numerous untranslated cookbooks by Indian kings, knights, nobles, warriors and others. Ancient literature mentions these people. Paintings exist, showing the orchestration of culinary effects on grills, ovens, barbecues, brochettes, in daubes and other styles of cultury preparations.

It was the discovery of this cuisine that led Alice B. Tokias to send me the most flattering of letters, which it would have been most impertinent to accept in any other way but as a salute to this cuising which awakens not only the five senses, but makes one hark back to the sixth sense.

This is it in cursory review: From the Punjab, both a smoked salad of lettuce and raw vegetables and an "air-spun" jelly. The latter is made in a drum-sized earthen chatti using fruit purée and powdered cuttlelish bone for gelatine. The chatti is lidded, placed upside down in the freezing winter nights. The frosted vessel is opened the next morning and long laties are

used to scoop out the most gossamer of jellies. There is the phalanx of pullao or pellao, proto. types of the pilaf and psella. But these-from the simplest marvels to the most complex concections of cream, yoghurt, milk, double consomme, butter, herbs, mests and vegetables—are also often band then steamed upside down. Chefs listen into the sealed daubes with ear trumpets to judge the corr.

ing by sound. Among the score of distinctly separate braised meats, the Doh-peeazah is made of white hollowed. out onions which enclose a nugget of lamb or chicken steamed in double consominé. There are the daubes, the estouffades, the cocottes dour feat which have hollow lids, where either burning charcoal or water is placed to drive down the natural juices steaming up. The flavors are first extracted, then reabsorbed and married, sometimes with no additives, as with a whole dry glazed leg

The most sophisticated of all is the daube (dumn-pokhtai) where the scaled vessel of earthhenware is sent spinning in a large vessel of boiline water. These daubes develop nuances no other culinary style can match. A set of six jars, with the ingredients only-for sauces is spun and spun again. The velvety sauces are too noble to be esten with meat or vegetable. Only smoking-not, un-leavened bread or rice is permitted by the purists,

Methods and Manners

There are techniques with collops (Pursindal), which are cut open, hammered, cut again, to five times their length, marinated and broiled on hot coals. Fish is steamed in hammocks of music Shellfish scorched in papeys or banana leaves; whole lamb is cooked underground with a bamboo tube in its mouth basting it with butter. There are griddles for meats made of chiseled tiles of granite, set overlapping fashion on the fire.

There is a cemented bed of snow-white river peb-bles where fish is smoked on fresh fennel, scorched by burning bay leaves first dipped in clarified but ter (ghes). Pomegranate paste is sandwiched in deep-fried fish steaks.

Methods and manners, 2 whole grammar and language of cooking using alchemy by heat, unparalleled use of herbs and aromatics, triumphs of cooking techniques... these are not curries, but curries belong to this culsine, even a curry of hot

All this is from the Indian home. With the great interest in food both in America and in Britain, there is no reason why, in the expensive 1976s. we should not free ourselves from restaurants and bring this Indian cuisine into the dining room.

This is the first of a two-part series on Indian cooking. Next Mr. Singh, author of several books on Indian cookery, will offer recipes and a prac-tical explanation of cooking methods.

By Laurie Johnston NEW YORK (NYT).-A de-

veloping shortage of vinyl, the oil-derived synthetic resin from which most records are pressed, causing postponements, cutbacks and uncertainties in the music-recording industry.

At the same time, there is speculation that the larger record companies are also seizing on the oil situation as an excuse to pare their own "fat" by tightening their distribution policies and gambling less on artists who are

not yet proven sellers. "More talent and less vinci" might be the emphasis for the future, many record executives

are saying.

The effects of the shortage, which is expected to increase the price of records, would be reflected at the retail level in about six months. The situation has given rise to frivolous proposals to make records from new substances ranging from pizzas, pancakes and tertillas to hubcaps and small manhole covers, as well as to serious plans for the re-

cycling of old records. It is a very real menace for small-label companies that are self-owned by the recording artists or that cater to ethnic and other specialized tastes, as well as for independent recordmanufacturing plants.

The tight supply of polyvinylchloride (FVC) for making records can be blamed most directly on the "exploding" demand for plastic plumbing-pipealso made of PVC-according to the vinylchloride manager of a major oil company's chemical division in Houston. He discussed the situation at length by telephone but asked not to be

"You push in on the petrochemical-supply balloon one place and it pops out somewhere else," the oil executive said. He cited a "lack of new plant capacity" to produce the raw materials for the PVC compound.

"We're trying to be more selective about everything and cut out extras, but we'll make sure the DJs get all our records." said Stan Cornyn, vice-president for creative services at Warner Bros. Records here. Industry sources generally agree

that the first to be hurt by the shortage perhaps mortally, in some cases will be the small companies that release records under their own label-names but do not manufacture them. They depend, often on a first-come first-served basis, on larger record companies such as RCA. Columbia. and Capitol or on independent manufacturers called "custom pressers," to turn vinyl compound

"The little fishes may get eaten up," Mr. Cornyn observed.

MUSIC IN ITALY: A Taste for Walton

By William Weaver

ROME (IHT).—Although he has been an Italian resident for many years (he has a handsome villa on the island of Ischia), Sir William Walton is not particularly familiar to Italian concertgoers. Last weekend, however, the Italian radio in collaboration with the British Council made partial amends, presenting an all-Walton concert in the RAI auditorium in Rome. The event attracted a capacity audience, and the recorded concert will also eventually be broadcast over the RAI's third

program. The RAI's Rome Symphony Orchestra (arguably the best orchestra in Italy) was conducted by Andre Previn. who successfully imparted to the Roman musicians Sir William's individual rather non-Mediterranean idiom. The orchestra's affinity for this, to them new, music was especially evident in the second half of the evening, devoted to the massive 1931 gratorio "Belshazzar's Feast," with its quirky, tricky rhythmic shifts and its

highly personal emotional climate. Here, the orchestra may have been influenced also by the presence-and the superb performance-of the London Symphony Chorus, flown from England for the event. Prepared by Arthur Oldham, this choir sang not only with admirable precision but also with an impressive intensity. The Italians were all the more awed to learn that the chorus is made up of amateurs, singing for the sheer joy of it, a joy that they manage splendidly to communicate to their listeners.

The soloist was the baritone John Shirley-Quirk, who brought all his musicality and authority to the part of the narrator, not long perhaps but of crucial structural importance, a kind of noble thread running through the work's rich texture.

The oratorio was preceded by the Violin Concerto: Here the soloist was the 24-year-old Korean artist Kyung Wha Chung—soloist and virtually co-conductor, for she seemed to have imposed her deeply felt reading of this mysterious piece on all of her col-laborators, including Previn him-self. The violinist's impassioned. total participation in the author's intention underlined the multiple meanings of what must be recog-

Defining SDR Stymies Monetary Reform Talks

ROME, Jan. 14 (Reuters).-World monetary experts meeting here today falled to make progress on the definition of the new reserve unit destined-to form the basis of a reformed monetary system, conference sources said. How to value this reserve asset, known as special drawing rights (SDRs), in order to make it an attractive alternative to gold, was the first item on the agenda of

Raw Material Costs Increase

LONDON, Jan. 14 (AP-DJ). -Prices of raw materials and fuel for British manufacturers rose 46 percent last year, the Department of Trade and Industry sald today.

46% in Britain

The department said the index for materials and fuel purchased by the manufacturing industry rose in December to 1729, up 45 percent from 165.4 in November and up 46 percent from 118.7 at the end of 1972 (1970 equals 100). The index rose 13 percent for all

French Trade Surplus Rises

PARIS, Jan. 14 (IHT) .- France recorded one of its best monthly trade surpluses in December, the Pinance Ministry reported today. pushing the nation's 1973 surplus 12.5 percent over the previous year's total.

On-a seasonally-adjusted basis. the December surplus totaled 935 million francs (about \$187 million)—a figure exceeded only in April and September and more than three times as large as the 280 million france recorded in the

1972 month. The gross surplus in December -847 million francs—was the fifth best of the year and well over the 61-million-franc surplus

of the 1972 month. The gross 1973 surplus totaled 6.683 billion francs. 12.5 percent ahead of the 1972 total of 5.94

billion francs. Finance Minister Valery Giscard d'Estaing hailed the December results as "good," noting that they include "the first con-

sequences of the oil crisis." The minister noted that although December's imports of petroleum products were almost dentical to the October level the December value of the imports was 38 percent greater. He also noted that the price of oil imports in December did not include the second round of price increases set in Tehran and he warried that the January and Pebruary trade figures will be

In a nationwide broadcast last week. Mr. Giscard d'Estaing warned that France would have to increase this year's trade surplus by 18 billion francs if the increase in petroleum prices is not to throw the nation's trade balance into deficit.

"markedly affected" by the rise

U.K. Trade Data Is Delayed by the Three-Day Week

LONDON, Jan. 14 (AP-DJ).— Announcement of Britain's December trade results, to have been issued tomorrow, has been delayed a victim of the country's energy crisis and the three-day

British visible trade deficits in October of £357 million and in November of £270 million were the two worst deficits ever. Results for December are also expected to be poor, reflecting both rising oil prices and the initial effects of the coal miners'

ban on overtime.

The Department of Trade and Industry, reportedly working by candlelight to compile the figures. is expected to announce last month's trade results sometime next week. Estimates of the deficit vary from £250 million to over £300 million.

This would mean a record visible trade deficit for 1973 of over £2 billion compared with a deficit of only £57 million in 1972.

Percentage change against the dollar trop central rates set by the 1871 Smuthsonian agreement as calculated by Morgan Guaranty Trust Co The Illuria are based on currency quota-

2 two-day meeting here of the Committee of 20 deputies. The deputies, whose task is to negotiate a reform of the world monetary system, are finance ministry and central bank officials from 20 countries. They are preparing the ground here today and tomorrow for their finance ministers, who will meet here at

the end of the week. Paul Volcker, Under Secretary for Monetary Affairs at the U.S. Treasury told reporters there had been no consensus on the problem of the valuation of

The general objective is to link the value of SDRs to the average value of a "basket" of major na-tional currencies. But there are differences about how this should be done.

Mr. Volcker, who described the discussion of the subject as "long and tedious," indicated that some delegates believe that valuing SDRs in terms of currencies was unrealistic unless the currencies themselves had stable values. This is not so under the present system of floating ex-

Mr. Volcker said, however, that the deputies had a good discus-sion on the other topic on today's agende how to strengthen the International Monetary Punds authority as the watchdog of in-ternational monetary affairs.

Governments are still officially committed to a target date of July 31 for reaching broad agreement on a new monetary system. but this target date is now generally regarded as unrealistic.

Price Impact Studied WASHINGTON, Jan. 14 (Reu-

ters .- Treasury Secretary George P. Shultz said today that a major concern of the C-20 ministers meeting in Rome will be the impact of the oil price increases on the balance-of-payments position of the less developed coun-

"It appears that the added

cost of oil to the less developed countries may wipe out the con-cessional aid grants given them. that, in effect, the energy crisis might wipe out efforts of all to help the poorest people earth." he said.

Mr. Shultz. who will leave tonight for the meeting, said that the United States expects that the ministers will examine the impact of the energy crisis

on monetary reform. We will try to come 10 grips with the facts and the should be done," he said.

The most that is expected from the meeting is that some progress can be made this year in strengthening the IMP by creating a high-level policy group capable of responding flexibly to changes in world financial conditions by warding off or mitigating currency crises and strengthening the role of the special drawing rights—the fund-created "paper gold" used by members in

central bank transactions.

To allow the finance ministers. to reach even the most tentative conclusions about the energy crisis and what to do about it. they have to have the facts.

For the moment, however, there are so many estimates about how much additional revenue the oil producers will earn this year, about the likely inflationary effect of increased oil costs and about balance-of-payments im-

pact on individual countries from the higher prices that the Rome

meeting may be only the first of

U.S. Payments Seen Worsening By \$9.2 Billion

many to be held this year.

BONN, Jan. 14 (Reuters).-Washington expects its balance of payments to worsen by \$9.2 billion this year due to the oil shortage and higher prices, for-mer West German Finance Minister. Alex Moeller said today after talks with U.S. Treasury Secetary George Shultz. Mr. Moeller told a press con-

ference the U.S. Treasury now expects a payments deficit of \$500 million instead of the \$5.7- Fiat, Alfa Raise billion surplus earlier forecast.
Oil-producing countries can now expect a surplus of \$65.8-billion against the earlier forecast

of \$12.5 billion. Mr. Moeller reported Mr. Shultz as saving He said that Mr. Shultz told him that the conference of foreign ministers of oil consumers to be held in Washington next month will aim to create a program to combat rising oil prices. It will also discuss programs for the joint use of existing energy supplies and for opening

up new sources of energy. Washington is convinced that bilateral agreements between oil producers and consumers were no solution. Mr. Moeller said. Mr. Shultz said that "these courtries cannot elude the worldwide effects of the energy crisis." Mr. Moeller said.

FINANCIAL NEWS AND NOTES

Germans to Build Libyan Tire Plant A West German consortium has received a contract to build a tire plant in Libya valued at 100 million deutsche marks. The Libyan stateowned plant will have the capacity to produce 450,000 car and truck tires a year and the cor-responding number of tubes. The German consortium, Dekoria, is headed by the Krupp ma-chine-building subsidiary, Krupp Maschineniabriken. Other members of the group are Phoenix Gummiwerke and the machine makers Hermann Berstorff. The contract also includes a five-year technical assistance agreement between the Libyan government and Phoenix after the completion of the plant.

BSN Earnings Up 30 Percent BSN-Gervais Danone estimates 1973 share earnings rose 30 percent to 101 francs (about \$19.50). Consolidated turnover was up 17 percent to 9.1 billion francs. The company's food sector accounted for the largest share of turnover with 4.9 hillion francs (54 percent of the total), flat glass 3.1 billion francs and packaging 1.1 billion francs. Company president Antoine Riboud Says that the sharp increase in the price of energy constitutes a major problem for 1974," and that

Japan to Buy Uranium From Eurodif The Japanese government has confirmed its intention of purchasing enriched uranium from the French-sponsored Eurodif project. An official of the five-nation Eurodif organization says that Japan plans to buy between one milion and 1.5 million separation units yearly between 1980 and

1990 at \$57 a unit. Formal signing of the accord is expected for June. The Japanese contract, the first for Eurodif, would correspond to about one-sixth of the projected plant's capacity of nine million tons of units yearly. The five members of Eurodif, which plans to enrich uranium through the gaseous process, are France, Italy, Belgium, Spain and Sweden,

Suez Group Buys Control of Salins Cle. La Henin, a member of the Suez banking

group, has acquired control of Salins du Midi following a takeover bid. A total 1.39 million Salms shares were tendered and all will be acquired by La Henin. Salins is a large salt producer with major interests in vineyards and real estate in southern France. The Suez group previously owned about 10 percent of Salins's capital. ITT Aims for Better Image

While final GNP figures for

omy slowed sharply in the fourth quarter and probably is heading for an outright decline in the current three-month period, government economists believe.

The drop represents a bumpy come-down from the "soft landing" path that Nixon administra-tion economists had charted for essing the economy off the un-sustainable boom of 1973's first

With the energy crisis threatening a crash landing rather than a soft landing, federal forecasters are tentatively projecting a mild decline for the economy's total output, or gross national product, in the current quarter, depending on the extent of fuel shortages.

Government analysts assert the low growth rate of the past quarter largely reflects supply and capacity problems rather than weak demand. "In a sense." said one, "it really isn't a sign of weakness but a sign that the economy is operating at peak capacity." With materials, re-

U.S. Incomes Hit by Prices

WASHINGTON, Jan. 14 (WF). -A congressional staff study re-ported yesterday that prices rose faster than incomes last year and that consumers are worse off now than they were at the beginning of 1973, and it predicted more of

the same in 1974. The study, released by the consumer economics subcommittee of the Joint Economic Committee, said that poorer people were hardest hit by the 1973 inflation because a "high proportion of their purchases are necessarily concentrated in such nems as food, housing and fuel, where price increases have been partitularly severe."

The report charged that the anministration "seriously underes-timated the severity of inflation in 1973 and its adverse impact on the economic position of consumers, Moreover, there is no indication at this time that the rate of inflation will moderate in 1974 and consequently the real purchasing power of consumers as

likely to continue to decline." It claimed that "to a consider-able extent the nation's current economic malaise is the result of a tendency to pretend problems are not scrious until a crisis occurs." It also accused the admin istration of not giving Congress or the public the full facts "in the hope of achieving certain

short-run political benefits." Sen. Hubert H. Humphrey, D., Minn., chairman of the subcom-mittee, said the "inflation of 1973 has resulted in cost-of-living increases greater than any experienced in this country since the end of World War II. A middle-income family with a budget of \$12,614, for example, had to pay an extra \$1.160 in 1973 just to maintain its 1972 hving

Dutch Prices Rise
THE HAGUE, Jan. 14 (AP-DJ).
The Netherlands consumer price
index was 134.1 (1969 equals 100)
in mid-December, up 0.5 percent
from mid-November, the government statistics office has announced. The average index for
1973 was 129.7, up from 120.1 for
the previous year, a rise of 8 per-

When Chemical bankers say "Yes" in London, it's an instant "Ja" in Frankfurt.

Regardless of what country you do business in, at whatever point on the globe you want a transaction done and whatever type of transaction it is, call on Chemical Bank. Whether you want to finance automobiles in Korea or vending machines in Japan. Or packaging machinery in Mexico or refineries in Iran. We can help. After all, we didn't get to be one of the world's largest banks by turning business down.

Information and decision-making.

We provide you with more than international services, we provide you with new solutions. Our financial experts are constantly exchanging information and experience with colleagues all over the globe, so that a "yes" in London can be acted on in Frankfurt or Singapore. Or anywhere else, instantly.

Time is money.

Our people are businessmen. They can find original, workable solutions to financial problems. They can make decisions, and they can make them on the spot. A Chemical banker knows that in business hesitation can be costly. Because time is money. Your Chemical banker understands your problems and he speaks your language.

Our world-wide offices.

Main Office: New York. Branch Offices: Brussels, Frankfurt, London, Paris, Tokyo, Zürich and Nassau. Representative Offices: Beirut, Birmingham, Madrid, Milan, Bogota, Buenos Aires, Caracas, Rio de Janeiro, São Paulo, Mexico City, Hong Kong, Manila, Singapore and Sydney. Correspondent Banks in over 185 nations.

When needs are financial the reaction is Chemical.

players is "Slam Bidding" by the Scottish authority Hugh Kelsey. The author deals competently with the basics-Blackwood, cuebids and so on. But the bulk of the book has to do with specialized methods popular outside the United States: the Roman two diamonds (or big three-suiters; asking bids, especially as developed in South Africa, and the elaborate Byzantine four no-trump convention, which has recently found favor

A useful new book for bridge

with British experts. A difficult example cited by Kelsey is shown in the diagram. Almost all pairs would play in spades and make 11 tricks, although 12 can be brought in if the defenders fail to cash their heart trick and the dismonds break three-three.

The author points out that a club slam, with a four-three fit, has a good chance. The 12th trick can come from a heart ruff in the North hand, so that the declarer makes five trump tricks, five spade tricks and two diamond tricks. Clearly a heart ruff is not helpful if spades

NORTH (D)

A AJ754 ♥ 2 ♦ AK94 ♣ J106 WEST EAST ▲ 10862 ♥ K1073 ♦ J75 ♦ 9 ♦ 9 AKQ5 East and West were vul-The bidding: 1 ♣ 3 ♦ 4 ♣ 5 ♡ 3 A Pass 4 N.T. Pass Pa:55 Pass Pass Pass 6 🚓

are trump—the ruff must come in the short trump hand.

The author suggests that six clubs should be reached by the auction shown. South jumps to three clubs in response to one spade, an action that would be favored by a minority of experts here, and shows a spade preference over three diamonds. North's preference to four clubs clearly shows exactly three-card support and implies a singleton heart, and this inspires South to launch into Bisckwood and bid the club slam.

The desirability of the club slam depends on North's pos-session of both black jacks, which is difficult for South to determine Without the club jack, the slam would be poor. Without the spade jack, it would be moderate

With the East-West cards as shown in the diagram, the club slam can be beaten by perfect defense. West leads a spade, knowing from the bidding that his partner must have a single-South wins in the dummy ton and must head for his heart ruff. He puts East to the test

by leading the singleton.

East is tempted to put up the ace, but should realize that his best chance lies in West's having the heart king. If he bravely ducks, he will get the spade ruff to defeat the slam, and South is poorly rewarded for his aggressive and imaginative bidding.

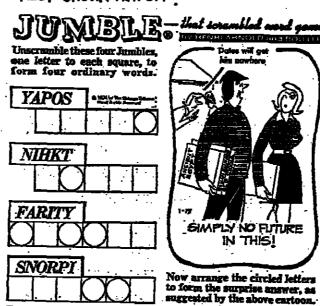

Pass West leads the spade two.

SUEA By Toni Morrison. Knopf. 174 pp. \$5.35.

FALLING BODIES By Sue Kaufman. Doubleday. 270 pp. \$7.35.

Reviewed by Christopher Lehmann-Haupt

TIME and again, one feels prose-poetry serves mainly to one's about to see what Toni Morrison is trying to do in her second novel, "Sula." One glimpses it for a moment in her artful evocation of the black community of Medallion, Ohio, which at the opening of "Sula" is about to be obliterated by a suburban golf course: "They are going to raze the Time and a Half Pool Hall, where feet in long tan shoes once pointed down from chair rungs. A steel ball will knock to dust Irene's Palace of Cosmetology, where women used to lean their heads back on sink trays and doze while Irene lathered Nu Nile into their hair. Men in khaki work clothes will pry loose the slats of Reba's Grill, where the owner cooked in her hat because she couldn't remember the ingredients without it." One almost glimpses it in the tragicomic family histories of the story's two heroines; of Nell, whose super-respectable mother brought her to Medallion (or the Bottom, as the black section of Medallion is called) from a New Orleans whorehouse; of Sula, whose grandmother is rumored to have stuck her leg under a sing train in order to live off the \$10,000 worth of mjury com-pensation she receives.

Or one almost glimpses Miss Morrison's fictional world in the violence with which her characters love one another: Sula's grandmother burns her own son to death for becoming a junky ("... He wanted to crawl back in my womb and well ... I sin't got no more room even if he could do it."), yet she leaps from a second-story window in a vain attempt to save her daughter, Sula's mother, from an acciden-tal burning. Sula herself is stricken when she causes a play-mate to drown, yet she is frozen in fascination as she watches her mother burn. And when the black community of the Bottom finally unites at the end of the novel, it is to celebrate National Suicide Day, a ritual Improvised by Shadrack, who has seen death while fighting in World War I,

And one comes closest to glimpsing the heart of "Sula" in the strange career of the title character herself—Sula, who is stamped above one eyebrow with a rose-shaped birthmark that may be either the mark of Satan or a third eye with which to look into the souls of her people: Sula herself, who in her apparently evil rebellion becomes the indestar by which the people of the Bottom guide their lives; Sula herself, who may very well be contemporary American fiction's first female "bad nigger"—that scapegoat that speaks in its de-fiant death the uncreated anger of its race.

and tried to bring it home to his

people.

The trouble is, Miss Morrison gives one the feeling that she has written each of her scenes from scratch—that is, that none of them have anything much to do with the ones that preceded

break up the flow of her mer. rative even further (if only for the simple reason that she so often seems to choose words sind ply for the sake of avoiding the cliches that the thrust of her phrases call to mind). My Eu-phrases call to mind). My Eu-phrases call to mind). picion is that she is rational material from her own life and has not yet objectified it suffihas not yet concentred it suit-ciently to make a coherent stor-out of it (and when she fines herself trapped in the discre-ancy between her feelings and her art, she tries to write herself out of it with her "poetry"). But whatever the reason, we can never piece the glimpses mto a coherent picture. And what Min Morrison had in mind in str. ing "Sula" finally remains un. articulated.

Whatever Sue Kaulman had in mind in writing her fourth nove,
"Falling Bodies," it is all too reli articulated. None of Miss Kauf man's characters ever leave any thing unsaid—not Emma Schier who is trying to redefine her role as a woman in the 'rough year' of her mother's death from cancer and her own affliction with a fever of unknown origin; no Emma's husband, Harold, a book editor who is declining into scute hypochondria and free-floating lust; not Emma's friend, Minda Wolfe a garrulous sex bomb the may be the most unpleasant New Yorker since Lois Gould wrete "Such Good Friends" and especially not Maria Carlotta Nune the Schiers' live-in housekeeper who goes on for pages in a Span ish-English dialect that even in early Eugene O'Neill would have

considered heavy-handed.

Also Miss Kaufman plots. contrives to put it more pre-cisely. Why, we wonder, don-Emma—who is not really such a bad sort, even if we have met he a hundred times before in novel of Central Park West domestic bathos put up with the insistent selfishness of Minda Wolfe? Why of course, so that Minda can eventually seduce Harold at big dinner party peopled with guests by the unlikely names of Jack Despres and Harley Scrim What is that burning smell the waits from the quarters of house keeper Maria Carlotta Noner Why, it is smoke from a fire to conjure an evil eve against Jo the back-elevator man who has seduced Maria... But I can ga on.

Of course I did go on ... ! the very end of "Falling Bodie. if only to find out why Emma temporarily obsessed with the falling bodies of suicides from high places. I went on to the very end, where Emma finally emerges from a personal chaos enough to compensate me for my efforts. Most of all, I was left with the feeling that Miss Kaulman is trying to strike a reason able bargain with women's lib-eration. For the sake of her future fiction, I hope they even tually make a deal.

Mr. Lehmann-Haupt is a Na them. Moreover her brooding Fork Times book reviewer.

Dolphins Left No Doubt About Their Super Bowl Superiority

Methodically Rout Vikings

By Red Smith HOUSTON, Jan. 14 (NYT).--In the bright, archaic lexicon of Noah Webster, "super" means "higher, greater, more than shove." Employing this prefix, we get "superfluous." "superfi-cial," "supernumase." cial," "supernumerary" and "su-persede," which Webster defined 23 'replace with something better." Here in Rice Stadium, where the professional football championship of all known planets has just been decided in Super Bowl VIII, the question is: What For the first time in eight con-

pions of the National and American Conferences, the title was decided in a sudden-death period

38 seconds, the Miami Dolphins ran or passed the ball 20 times. 120 yards and scored 14 points. The offensive unit did. that is. In the same space, the Miami defensive forces permitted the Minnesota Vikings to run the ball twice and pass it once for nine yards and nothing else.

had a 24-7 victory for their second

41-minute show for television.

It was not a superficial feat.

Difference in Price Those odds of 4 to 3 reflected the difference between the teams more accurately than the official betting line that favored Miami

by only seven points. The difference was glaring, even in the murky Texas climate. which was as glum, but not quite, as the Minnesota coach. Bud Grant, who stood on the sideline muttering into a headset while his purple windbreaker and purple alacks turned pale.

the quarterback said. "I thought As is their custom in postseason games, the Dolphins won The Dolphins had more than a few of those on the Vikings, al-though most said their playoff the coin toss, elected to receive to score the first two times they had the ball. They had done this against Cincinnati when they won the first half of the American Conference championship. and against Oakland when they took the remaining half.

> Not until the second period, after 18 minutes and 29 seconds of play, did they have to give up position on a punt.

> Disgorging the ball like that seemed to embarrass them, and they set about quickly to show that it hadn't really been necessary. On the very next time they had possession, they went gamboling down to the Minnesota 21yard line, where it was fourth down with about 14 inches to go. They were leading by only 14 points at the time, and a team ess sure of itself than Miami might have gone for a first down and tried to add a third touch-

The Dolphins, bowever, just trotted in little Garo Yepremian. who sideswiped the ball 28 yards for a lead of 17-0. At this point Miami had gained 153 yards, Min-

"At \$15 a ticket," a man said, "this show is a disaster. They ought to hire Abe Burrows to write in some laughs."

Burrows wasn't available, but the Vikings contributed some low comedy on their own. About two-thirds of the way through the third period, their defense flattened Mercury Morris for an eightvard loss on a third-down play that started only five yards from the goal line. It looked as though they might actually be blunting a scoring threat, but Wally Hilgenberg, the Minnesota line-backer, was lagged for defensive holding on the play, the Dolphins got a first down, and moments later the score was 24-0 on Latry Csonka's second touchdown. Jim Kilck, who had not scored all season, got the second sixpointer.
At long last, the Vikings scor-

ed, but swiftly reverted to type and took another pratfall. They tried a short kickoff, recovered the bounding ball near midfield. and had to give it up because somebody had been offside on the kick. It was comical, but it wasn't

AHEAD ON POINTS-Jim Kiick lands on his helmet as he scores from one-yard line for Miami's second touchdown while in photo below, Dolphins' running star Larry Csonka is stopped by Minnesota Vikings' Jim Marshall after a nine-yard gain in first half.

Vikings Couldn't Stop Winner's Perfect Attack

HOUSTON, Jan. 14 (NYT) .-It's the most well-coordinated offensive team I've ever seen," Jack Paters said yesterday in a tribute to the Miami Dolphins and their 24-7 Super Bowl victory.

Patera, the defensive line coach of the Minnesota Vikings, had prepared for the Dolphins offense on the premise that the Vikings could huster enough muscle to contain the strong Miami running

"We looked at them on film. and they were the most impressive offensive team we'd seen." Patera said "But we thought maybe some of those other teams like Cincinnati or Oakland didn't prepare for them properly. We took great pains to prepare for this game, but they went out and did the same thing to us." The Dolphins' overwhelming

dominance was reflected by the air of resignation in the Minnesota dressing room, almost as if the Vikings ere relieved to be free of further embarrassment.

Viking players offered few explanations for the countless mistakes and penalties that continually nullified their bright moments. Fran Tarkenton defended the decision to run on fourth down from the Miami six-yard line late in the second quarter. The Vikings, trailing, 17-0, needed "three inches" for the first down, according to Tarkenton.

"We had the first down made." said the Minnesota quarterback, who was forced to pass more than be had anticipated because of the early deficit and the inability of the Vikings to mount a serious running game. "We (Oscar Reed) just fumbled the ball."

A defensive holding penalty against Wally Hilgenberg, a linebacker, also eave the Dolphins the impetus for their final touchdown, after the Vikings had seemingly trapped Mercury Morris for an eight-yard loss on third and four at the Viking five-yard line. "They called Wally for holding their pulling guard on the play, (Eob) Kuechenberg," Patera said "It's inconceivable that a linebacker would want to hold an offensive guard. I've never seen one called like that.".

Coach Bud Grant ruled out the possibility that the week off he had given the Vikings before coming here (Mismi took no break) had stripped some of the attack or contributed to the clipping and holding penalties. "There's no magic to what they do," Tarkenton said of the Dolphins' meticulous efficiency. "We never did establish much of a running game even when they

were laying back for the pass. They just played well." They're just a great team and they execute well." added Jeff Siemon, the Vikings' middle linebacker, who was neutralized most of the game by effective blocking from the interior Dolphin offen-

sive line. Patera said he thought the Dolphins hurt the Vikings with quick-hitters involving Larry Csonka, the 237-pound fullback, particularly when the defensive linemar came off the line too aggressively and were cross-blocked before they could fill the open

"I don't know if there's anything we could have done' Alan Page, the defensive tackle said, on how the Vikings might have stopped Csonka and company. Tarkenton seemed almost stoical rather than frustrated by the failure to leave a winner. "You play the game at great

risk," he said. "We went out and gave it a shot and weren't good enough." Tarkenton praised Csonka as the "strongest fullback I've ever seen. I don't think I ever saw a fullback play any better" he added. "They are an excellent football team and played as near to perfect as you can play."

A Mile for a Camel

WASHINGTON.—The French with Saudi Arabia—oil in exchange for Mirage airplanes and sophisticated arms, The British are in the process of making a similar deal with other Arab oil producing countries including the tiny shelkhdoms along the Persian Gulf

The cruel fact is that in order to guarantee an adequate fuel supply for itself,

any industrialized nation is now willing to give the Arabs all the weapons they

The big question is how much sophisticated armaments can the oil producing

sorb? Most of their land is covered with sand inhabited by Bedouins who still are not oute used to the sudden wealth that is being showered

The following scene will probably take place in a year or two: A Bedouin camp 300 miles from the Saudi Arabian capital of Riyadh. The chief of the area pulls up in a brand new British armored personnel carrier.

"Ahmed," shouts the chief. "you lary lout, wake up and come out of your tent, I have a gift from the king for you!" Ahmed rushes out of the tent. "Did you bring me a camel?"

"I did better than that, my desert friend. See what I have on the back of the new British armored personnel carrier. Ahmed follows him to the rear of the truck.

Designer of Opera In Sydney Honored

SYDNEY, Jan. 14 (Reuters) .-Jörn Utzon, the Danish architect who designed the controversial Sydney Opera House and resigned in 1966 after a row over its cost, has been awarded the Royal Australian Institute of Architects gold medal for 1973.
"No other single building in Australia is so widely known and admired throughout the world," the institute said. The opera

have just made a new deal from the object he has in tow. "What is it?" Ahmed asks, staring at the strange machine. "It is the latest French fighter plane, the Phantom-Mirage. It will fly at speeds over 1,100 miles an hour and can carry six air-to-air supersonic missiles. Now

> "I still would rather have a camel," Ahmed replies.
> "How dare you talk that way about a gift from your most gracious sovereigu?"

what do you say?"

"Forgive me," Ahmed says fearfully, "but I already have four British fighters, six American Skyhawks and seven heavy armored helicopters out behind my tent. What I really need is something that can cross the desert and doesn't use up water." "I will forget I heard your treasonous words. His Majesty has vowed that every citizen in his country will have a complete air squadron of his own by 1977. Now where do you want us

to put the Mirage?' "Put it pext to the British Centaur tanks you brought me last week. Are you sure I was supposed to get 30 tanks? You know we don't have any chil-

The chief checked in his book. That's correct. You are to have 30 tanks, plus 2,000 rounds of armor-piercing cannon shells." "Are you certain His Majesty didn't mention anything about giving me a camel? You see my old one is on his last legs, and if I could get a new camel I could sell the dates from the Wadi ossis and go to the market at Medina and ..."

"Silence, you ungrateful wretch. The next thing you will tell me is that you don't want a nuclear submarine."

"A nuclear submarine?" "That is right. The French have agreed to sell us 1,000 nuclear submarines in exchange for 1.000 barrels of oil, As soon as we get the transportation, we will be delivering one to you."

Ahmed sighs, "All right, But if you can't get me a camel, what about a donkey? I could make do with a donkey until I have enough money to buy a camel." The chief got back on his armored personnel carrier and

just laughed. "What industrializ-

ed country in the world would

ERMATT, Switzerland (IHT). -Like everybody else, the Swiss are learning to cope in a world short of gasoline: The speed limit has been set at 65 miles an hour, foreigners' cars are turned back at the borders

if their tanks are less than three-quarters full and thermostats have been turned down to 68 degrees Fahrenheit, even at the hotel in Geneva where Arab oil ministers met this month to discuss the next upward step in their pricing strategy. "In previous winters it has just been too hot," explained a spokesman for the hotel,

trying to sound sincere.

Just in time for the skiing eason, Switzerland did lift a three-weck ban on Sunday driving, but in most resorts there is eneral nervousness. In Zermatt, however, all is calm. The automobile has been banned from this resort for 15 years, a decision resoundingly upheld in an election just over a year ago. Streets are for pedestrians in this village at the base of the Matterhorn.

By a vote of 937 to 405, the residents of Zermatt rejected a proposal to extend to the village a surfaced road that ends three iles away, and with it the car traffic the road, would have brought-or, as they now note Zermatt with the price of gas at 85 cents a gallon, might have brought.

"No. Forget about it. Kecp the cars out. That's what we said," declares Constant Cachin. the director of the local tourist

Zermatt this winter remains a place where pedestrians share snow-packed streets with oldfashioned horse-drawn sleighs and the small, modern electric

A morning scene in downtown Zermatt.

The Lucky, **Carless** People of Zermatt By Barbara Bell

cars-somewhat like golf carts that are used here solely to transport goods. This is a village where skiers extend their lest runs of the day down mountains all the way to their front doors and where children hitch rides and groceries get pulled home from supermarkets

Five of the 18 colorful sleighs that jingle through Zermatt are owned by local hotels. The rest are simply labeled "Taxi." can be either booked by telephone through a dispatcher and a radio strapped across the drivers' chests or flagged down as they trot by. When the snow melts, the sleighs are exchanged for carriages.

According to Mr. Cachin, the only exceptions to the ban on gasoline-powered vehicles in the village are made for ambulances and garbage collection equip-

Zermatt lies at the upper end of a spectacular Alpine valley, close to the southern border of Switzerland, and at an altitude of 5,300 feet above sea level. As early as 1892, the steam-powertrains of a narrow-gauge railroad called the Brig-Visp-Zermatt were climbing from the railway junction town of Visp. at an elevation of merely 2,100 feet, up the rugged 25 miles to Zermatt, More than 75 years later, almost all visitors to the village still arrive aboard the

Motorists can drive up the

valley from Visp today as far as the village of Tasch, but there they must leave their cars in a parking lot and catch one of the small red trains of the BVZ -which now run on electricityto travel the remaining three miles to Zermatt.

From Tasch, an unimproved road continues to the outskirts of Zermatt, but only residents of the village and workers there are allowed to drive along it. According to Mr. Cachin, the question of the automobile's ex-clusion from Zermatt didn't arise until the late 1950s simply because no automobile managed to reach the village until then. In 1959, by a margin of 3 votes, cars were first banned from

In 1964, with tourism bringing increasing affluence to Zer-matt's hotel keepers, mountain guides and ski instructors, public opinion had shifted and residents voted by a majority of 2 to 1 to ask the canton of Valais to extend the surfaced road to Zermatt. In 1971, the cantonal government finally appropriated 25 million Swiss francs to construct this road and the appearance of the automobile in the still-tranquil stree:3 of the village seemed

But Jacques Darioli, the manager of a restaurant called Le Gitan, and six other young residents of Zermatt—all between the ages of 20 and 35"Julie Banning, alone and de-pressed in her widowhood, relies more and more on Bob Anderson's friendship and sees him often. When his wife, Phyllis, returns he finally admits his desire for Julie to himself and begins to realize these feelings and emotions are hurting his cynical relationship with Phyllis." Thus reads Bryna Laub's sum-

mary of a recent episode on "Days of Our Lives," an NBC soap opera. Mrs. Laub, 28, has seven television sets in her home in Mountain View, Calif. And all tuned to soap operas with tape recorders picking up dialogue. Mrs. Laub gave up her career as a high school science teacher 18 months ago to put out a monthly newsletter on what TV people call "daytime serial dramas." The 12-page, 9,000word report (\$7.50 for a year's subscription) summarizes in detail the plot development of all 14 network programs. According to Lacey Fosburgh of The New York Times, Mrs. Laub has about

8,000 subscribers. "Three across (three programs running simultaneously) drive me out of my cotton-picking mind," she said. "'If someone decides to sneak into the bedroom and kill someone with a hypodermic needle, or the wife finds lipstick on her husband's collar and faints. I don't know about it unless I've been watching, because with no sound none of it comes across on the tapes." Mrs. Laub's interest in soap operas got started when she was studying biology at Boston University—and just grew and grew. "People who say daytime television is un-realistic are off the wall," she said. She says it is a barometer of what's happening in society.

Milton J. Shapp, the Democratic governor of Pennsylvania, has written two songs—"No Shortage of Love" (about the energy crisis) and The Ballad of Rose Mary" (a spoof on Watergate)—that were recorded this werkend. David Stauren, a young Philadelphia composer, was called in to jazz things up. Sue Levinson, a 23-year-old Spanish teacher, did the singing. "I've wanted to do this all my life," Shapp said during the recording session.
A sample of the lyrics: ... Rose Mery, you found your place in history. For 18 minutes you sat there alone with your foot on the pedal and your hand on the phone. Then something happened that was mighty, mighty

ADVERTISEMENTS REAL ESTATE FOR SALE

finding parking space for thou-sands of cars," Mr. Darioli ex-

plained, sitting in front of a

blazing fire in his restaurant,

"and about air pollution and

noise and whether the character

of the village might change with visitors driving in for only

a few hours instead of stay-

ing for a week or two as many

do now. So early in 1972, we

Zermatt the Way It Is and got

510 signatures on a petition

asking the Town Council to

reopen the issue and hold an-

other public vote on the road."

distributing posters showing the Matterborn grimacing over au-

The Swiss television network broadcast a debate live from Zermatt on "The Road," asking

viewers to write expressing their opinions. Some 14,000 respond-ed, 97.8 percent of them oppos-

ing the extension of car traffic

Finally, 150 visitors staged a

torchlight parade through the

village, carrying signs reading "No to the Road to Zermatt."

than 2-to-1 vote here against

ponents were either young or very very old," said Mr. Darioli.

in the future, Zermatt will come

out shead by staying the way

it has always been.'

We all seemed to agree that

And then came the better
